

CSA1503-Cloud computing and big data analytics

Experiment-5

5. Create a simple cloud software application for Mark Sheet Processing System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as name of the student, Reg no of the student , Subjects , Marks, Average, percentage, rank, overall performance etc.

INPUT:

The screenshot displays a web application titled "Mark Sheet Processing System" in a browser window. The browser's address bar shows "View.as" and a user profile "MySelf-". The application has a dark sidebar on the left with the "Mark Sheet Processing System" logo and three menu items: "Mark Sheet Processing System", "Mark Sheet Processing System", and "Mark Sheet Processing System Report". The main content area is titled "Mark Sheet Processing System" and contains a form with the following fields:

- Student Name:
- Register Number:
- Department:
- Semester:
- Subject 1:
- Mark 1:
- Subject 2:
- Mark 2:
- Subject 3:

The bottom of the form shows a "Submit" button. The browser's status bar at the bottom indicates "Trial expires in 15 days" and an "Upgrade" link.

Output:

Mark Sheet Processing System
